Castel has always been aware of environmental sustainability issues and gives its contribution to a cleaner environment, supplying the refrigeration and air conditioning industry with state-of-the-art and environment-friendly technology. With its commitment and steady research in its laboratories, Castel has developed a whole range of products using natural refrigerants, which reduce emissions to the minimum.

Castel can accept no responsibility for any errors or changes in the catalogues, handbooks, brochures and other printed material. Castel reserves the right to make changes and improvements to its products without notice. All trademarks mentioned are the property of their respective owners. # Ball valves arranged for the actuator assembly

The products, shown in this leaflet, are designed for installation on commercial refrigerating systems and on civil and industrial conditioning plants.

The valves series:

- 6570 ; 6571 ; 6590 ; 6591
- 6570EL ; 6590EL
- 6570E ; 6590E
- 6577E ; 6597E
- 6578E ; 6598E

may be coupled, **with suitable flanged adapter separately sold**, to the electrical actuators supplied by Castel.

The available adapters have the following codes:  
**9901/X21 ; 9901/X22 ; 9901/X23 ; 9901/X27 ; 9901/X28 ; 9901/X30.**

The right matchings of: *valve + adapter + actuator* are shown on the enclosed tables of ball valves. After coupling the ball valve to the actuator it is possible a remote control on valve opening / closing or a manual control, excluding the actuator.

**All the electrical actuators can be equipped with auxiliary switch units, separately sold.**

As above the ball valves arranged for motor-driving, are the following ones:

- Series: 6570 ; 6571 ; 6590 ; 6591 with PS = 45 bar, copper connections equipped, for systems with traditional fluids: R134a, R22, R404A , R407C, R410A, R507. For specific applications with other fluids, please contact Castel Technical Department.
- Series: 6570EL ; 6590EL with PS = 60 bar, copper connections equipped, for CO<sub>2</sub> sub-critical systems.
- Series 6570E ; 6590E with PS = 80 bar, copper connections equipped, for CO<sub>2</sub> trans-critical systems, low pressure side and medium pressure side.
- Series: 6577E; 6597E with PS = 120 bar, reinforced copper connections equipped, for CO<sub>2</sub> trans-critical systems, high pressure side.
- Series: 6578E ; 6598E with PS = 140 bar, stainless steel connections equipped, for CO<sub>2</sub> trans-critical systems, high pressure side
