

CASTEL STRENGTHENS ITS POSITION IN FLUID CONTROL THROUGH THE ACQUISITION OF A BE FLUIDICA BUSINESS UNIT

Castel announces the acquisition, effective June 3, 2026, of a business unit of Be Fluidica, an Italian company specialized in the design, manufacture, testing and supply of devices for the regulation, filtration and lubrication of gaseous and liquid fluids.

This transaction is fully aligned with Castel's growth strategy and represents a further step in the Group's expansion within the fluid control sector.

The expertise developed by Be Fluidica in specialized industrial applications and the development of customized solutions complements Castel's established know-how, further enhancing the Group's ability to serve an increasing range of industrial applications.

For customers, this acquisition will result in an even broader and more specialized offering in fluid control and treatment, with enhanced capabilities to develop tailor-made solutions for highly complex applications and to effectively support innovation processes and the transition towards increasingly efficient and sustainable solutions.

"This acquisition represents a natural step in Castel's growth journey and confirms our commitment to strengthening the Group's position in fluid control," said **Giacomo Salina, President of Castel**. "The specialized expertise and customer-focused approach to customized solutions developed by Be Fluidica are a perfect fit with our industrial strategy. This transaction will enable us to further expand our offering and create new value opportunities for customers across a wide range of application sectors."

Through this transaction, Castel reaffirms its commitment to investing in expertise, innovation and industrial development, further consolidating its role as a leading technology partner in fluid control and in supporting the sustainable growth of its customers.
